

CODE WHITE

An interprofessional
approach to working with
patients who are agitated

A SIMULATION EXPERIENCE

- Students will collaborate in interprofessional teams to engage in this simulation experience
- Participants will be asked to provide feedback after the experience to help improve future offerings

LEARN

Work with standardized patients and a team of health professionals and learners to gain experience in working through applying new skills and observing others

DEBRIEF

Expert facilitators will help student teams debrief about their experience with the simulation and consider how the skills applied can be translated to many different clinical settings

APPLY

Content will be applicable to working with clients / patients of all ages.
